Personal Statement

I possess a constant thirst for knowledge and am always seeking to better myself. I love working with others and my positivity and optimism fosters an environment that helps everybody achieve better outcomes. As an engineer I am well rounded and have an innate ability to understand and learn new things quickly. These qualities along with a healthy dose of passion and charisma have helped me maintain continued success in both my personal life and career.

Projects - Experience

Co-Founder PiRhoSoft, Inc. (Game and Game Technology Development) - Since February 2016

The Art of War

- Commercially released Xbox and PC game created in 6 months for Microsoft's Dream.Build.Play. competition
- Implemented realtime Client/Server network architecture with input prediction and lag compensation
- Wrote an animation system using inverse kinematics for natural arm and leg movement
- Created a custom swept collision system utilizing the separating axis theorem
- Developed innovative AI architecture for platform traversal using navigation graphs and A*

Pargon

- Custom built, cross-platform, C++ game framework
- Implemented multiple graphics layers in DirectX11, DirectX12, OpenGL, and Metal
- Developed UI layout and styling system

Unity Composition and Tool Suite

- Designed a modular, extensible, user friendly API and authored design documentation
- Wrote a custom expression parser, lexer, and evaluator for simple runtime scripts
- Developed a system for runtime type erasure in C# and Unity
- Implemented a data binding system for Unity user interfaces

Photon Phanatics

- Commercially released iOS puzzle game showcasing my creativity and analytical thinking ability

Maine EMS

- Prototype iOS and Android app created for the state of Maine's EMS protocol reference
- Built using Xamarin and adhering to MVVM architectural pattern
- Parsed and analyzed PDFs to convert to a native and more readable format

Languages - Tools - Frameworks

C#	■■■■■	HTML/CSS/JS	■■■□□	Xamarin	■■■■■
C++	■■■■■	Python	■■■□□	IOS/Objective-C	■■■□□
HLSL/GLSL	■■■■■	Wordpress/PHP	■■■□□	Android/Java	■■■□□

Education

University of Washington • Class of 2012, Seattle, WA

- **Bachelor of Science** in Biochemistry
- **Bachelor of Arts** in Public Health

Other

- Worked as an EMT for Seattle FD and American Medical Response as in downtown Seattle for 3+ years
- Created a Wordpress driven website for my significant other's personal blog - designed theme from scratch in PHP, JS, HTML/CSS using Google's Material Design philosophies
- Coached an 11-12 year old junior football team for four years
- Made my first video game in Flash when I was 12 years old and have worked on numerous other personal projects since then
